

ROMI PUTRA

IT Infrastructure & Endpoint Management Engineer

[Email](#) | [LinkedIn](#) | [GitHub/Portofolio](#)

PROFESSIONAL SUMMARY

IT Infrastructure & Endpoint Management Engineer with 15+ years of experience supporting enterprise IT infrastructure, endpoint management, and technology deployment across banking, government, and managed network environments. Experienced in Microsoft 365, VMware Workspace ONE, Fortinet SD-WAN, VPN solutions, and secure IT asset lifecycle management. Proven in enterprise rollout, migration, troubleshooting, user enablement, and cross-functional collaboration.

CORE COMPETENCIES

Enterprise IT Infrastructure	Network Infrastructure
Endpoint Management	SD-WAN Deployment
Infrastructure Deployment	Branch IT Operations
Windows Endpoint Lifecycle	Infrastructure Monitoring
Microsoft 365 Deployment	Secure IT Asset Lifecycle
VMware Workspace ONE	Infrastructure Troubleshooting

PROFESSIONAL EXPERIENCE

PT. Bank SMBC Indonesia Tbk

IT Branch Service Engineer

Jan 2018 – Present

Endpoint Management & Deployment

- Executed Windows 11 upgrades, BIOS, firmware, driver, and operating system updates while preserving user data and maintaining endpoint stability and enterprise compliance.
- Deployed Microsoft 365 applications and Outlook based on role-based software assignments.
- Enrolled Windows endpoints into VMware Workspace ONE and validated device compliance according to corporate standards.
- Configured secure VPN access using Workspace ONE Tunnel and MobilePASS+ for Windows and mobile users.
- Coordinated BitLocker encryption rollout and verified endpoint readiness during enterprise deployment initiatives.
- Resolved endpoint and application issues through remote support while managing incident documentation and service requests using ServiceNow.

Infrastructure Projects

- Supported Fortinet SD-WAN deployment by validating connectivity, business applications, ATM services, and voice communications following standardized implementation procedures.
- Successfully deployed approximately 100 Mini PCs replacing legacy desktop systems as part of enterprise endpoint modernization initiatives.
- Supported branch relocation and branch closure activities, ensuring endpoint readiness and operational continuity.
- Assisted installation and validation of Panasonic TES824 PABX systems, enterprise printers, multifunction devices (MFD), and shared scanning services.

Endpoint Security & IT Asset Lifecycle

- Maintained endpoint security compliance through Sophos deployment, version validation, upgrade execution, and remediation of failed endpoint protection updates.
- Performed secure data sanitization using Active@ KillDisk prior to hardware disposal or auction processes.
- Executed secure tablet wipe procedures and storage media health verification while completing disposal documentation in accordance with corporate security policies.

PT. Compnet Integrator

Nov 2017 – Feb 2018

Field Technician – Project Korlantas (*Department Professional Services*)

Site Infrastructure Deployment

- Prepared project sites for SIM Online implementation by deploying workstation infrastructure, network cabling, electrical connections, printers, cameras, and supporting peripherals according to implementation plans.

System Deployment & Configuration

- Installed and configured Windows operating systems, SIM Online applications, enterprise software, and antivirus solutions across newly deployed workstations following standardized implementation procedures.

System Validation & Go-Live

- Validated end-to-end system functionality, including network connectivity, file sharing, application workflows, and physical SIM printing to ensure production readiness prior to go-live.

User Training

- Delivered operational training for registration, examination, printing, and supervisory personnel to ensure effective use of the SIM Online system after deployment.

Mobile SIM Unit Support

- Configured SIM Online application connectivity for mobile registration units using USB modem connections and verified operational readiness during field implementation.

CV. Utama Jaya Mandiri

Lead Network Engineer

Jan 2012 – Aug 2017

Team Coordination & Service Operations

- Coordinated two field technician teams by prioritizing installation requests and customer incidents based on operational impact and service urgency.
- Prepared daily work assignments, monitored field activities, and coordinated technical support to ensure timely service delivery and customer satisfaction.

Network Planning & Site Survey

- Conducted onsite site surveys by collecting GPS coordinates, evaluating line-of-sight conditions, and assessing environmental obstacles to determine wireless deployment feasibility.
- Performed network planning using Google Earth and The Dude to identify optimal access point locations, estimate infrastructure requirements, and support deployment planning.

Wireless Infrastructure Deployment

- Installed and configured Ubiquiti wireless equipment, customer premises equipment (CPE), access points, routers, and supporting network infrastructure for residential and business internet services.
- Integrated internet connectivity with CCTV systems and customer network devices while validating service availability after installation.

MikroTik Administration

- Configured and maintained MikroTik routers using Winbox, including IP addressing, DHCP, NAT, bandwidth management (Simple Queue), and customer provisioning based on operational requirements.
- Performed troubleshooting and configuration adjustments to restore customer connectivity and maintain network stability.

Infrastructure Operations

- Supported central wireless infrastructure consisting of MikroTik routers, D-Link switches, and wireless access points while managing IP addressing, firewall, NAT, and remote CCTV connectivity.

EDUCATION

Associate Degree in Management Information Systems (A.Md.)

Universitas Jayanusa Padang

GPA: **3.34/4.00**
