PROFESSIONAL SUMMARY

IT Infrastructure & Endpoint Support Engineer with 14+ years of experience across banking, government project, and managed network environments. Hands-on endpoint deployment and support for 9 branches in West Sumatra (100+ users): Windows 11, Microsoft 365, VMware Workspace ONE, Sophos, DLP, BigFix, and VPN, backed by remote troubleshooting through ServiceNow, DameWare, and Microsoft Teams. Earlier background in designing and deploying Ubiquiti wireless networks and CCTV systems (covering about 75% of Padang), MikroTik / Windows Server administration, and server room operations.

CORE COMPETENCIES

Endpoint Deployment & Support	**Remote Troubleshooting**	**Windows 11 Lifecycle**	**Microsoft 365 Deployment**
VMware Workspace ONE	**Sophos / DLP / BigFix Agents**	**VPN Client Setup**	**ServiceNow**
SD-WAN Branch Support	**Server Room Operations**	**Network Connectivity**	**Secure IT Asset Disposal**

PROFESSIONAL EXPERIENCE

PT. Bank SMBC Indonesia Tbk — *Apr 2018 – Sep 2026*

IT Branch Service Engineer

Contracted via: PT Mitra Infoparama (Apr 2018 – Mar 2021) | PT Samafitro (Apr 2021 – Sep 2024) | PT Intikom Berlian Mustika (Oct 2024 – Sep 2026)

Endpoint Deployment & Support

- Executed phased Windows 11 upgrades and fresh installations (on new PCs and laptops) aligned with procurement cycles and hardware specifications, including BIOS, firmware, and driver updates while preserving user data.
- Installed Sophos, DLP, BigFix, and Workspace ONE agents on user PCs and laptops and verified synchronization to each management console.
- Enrolled Windows endpoints into VMware Workspace ONE and validated device compliance against corporate standards.
- Installed and configured VPN access (Workspace ONE Tunnel, MobilePASS+) for Windows and mobile users.
- Deployed Microsoft 365 applications and Outlook for users in designated positions, based on role-based software assignments.
- Applied BitLocker encryption on company laptops/notebooks for designated positions, per company policy, and verified readiness during enterprise rollout.

Remote Support & Operations

- Resolved 4–8 incidents and service requests per day across 9 branches using DameWare, Quick Assist, Remote Desktop, and Microsoft Teams, with full documentation in ServiceNow.
- On own initiative, maintained an ATI server checklist and produced daily network reports.

Branch Infrastructure Projects

- Executed branch-level Fortinet SD-WAN cutovers following HQ-provided implementation modules and remote guidance; validated connectivity, business applications, ATM services, and voice, then reported results to the central team.
- Installed Windows and standard branch applications on approximately 100 Mini PCs replacing legacy desktops.
- Prepared endpoints for branch relocation and closure to maintain operational continuity.
- Assisted installation and validation of Panasonic TES824 PABX, enterprise printers, multifunction devices (MFD), and shared scanning services.

Server Room & Connectivity

- Performed rack-and-stack installation, routine maintenance, hardware diagnostics, and component/unit replacement (RMA) inside the server room in line with banking SLAs.
- Owned connectivity validation for new network cutovers and SD-WAN integrations; user-desk cabling was handled by the installation vendor.

Endpoint Security & IT Asset Lifecycle

- Maintained Sophos compliance through version validation, upgrade execution, and remediation of failed protection updates.
- Performed secure data sanitization with Active@ KillDisk prior to hardware disposal or auction.
- Executed secure tablet wipes and storage media health checks, completing disposal documentation per corporate security policy.

PT. Compnet Integrator *Nov 2017 – Feb 2018*

Field Technician – Korlantas Project (Professional Services Department)

- Prepared project sites for the national driver's license system (SIM Online) of the Indonesian National Police Traffic Corps (Korlantas): workstations, network cabling, electrical connections, printers, cameras, and peripherals.
- Installed and configured Windows, SIM Online applications, enterprise software, and antivirus on newly deployed workstations following standard implementation procedures.
- Validated network connectivity, file sharing, application workflows, and physical SIM printing before go-live.
- Trained registration, examination, printing, and supervisory staff on SIM Online operation.
- Configured SIM Online connectivity for mobile registration units over USB modems.

CV. Utama Jaya Mandiri *Jan 2012 – Aug 2017*

Lead Network Engineer

- Coordinated two field technician teams, prioritizing installation requests and customer incidents by operational urgency.
- Designed and deployed a Ubiquiti-based wireless network (Kenbotong, grid, sectoral, omni, and Rocket Dish at 2.4/5.8 GHz) with the core server at Pondok Elektronik, covering approximately 75% of Padang city, including areas other ISPs did not reach.
- Built network servers from scratch through go-live: MikroTik core (firewall rules, port forwarding for CCTV/internal access, multi-ISP load balancing) plus one Windows Server as relay/proxy for traffic and access control.
- Delivered wireless intranet/internet and CCTV monitoring projects for corporate and individual clients, including Semen Padang (Karang Putiah mine and Indarung IV), Universitas Andalas (connected existing campus CCTV), and local businesses; online viewing from PC, laptop, and smartphone. Tower installation was handled by partners.
- Conducted site surveys (GPS, Google Earth, The Dude) and mapped long-range point-to-point links to remote sites.
- Configured IP addressing, DHCP, NAT, and simple queue bandwidth management; troubleshot network issues to keep services stable.

EDUCATION

Associate Degree in Management Information Systems (A.Md.) *Graduated Oct 2011 | GPA: 3.34/4.00*
Universitas Jayanusa Padang
